

LUXE
LUXE *Satin*™
High Performance Tire Treatment

Application Guide

How To Apply Luxe Satin Tire Treatment

- Step 1: Read and follow safety instructions
- Step 2: Tire cleaning (critical step)
- Step 3: Completely dry tire
- Apply Luxe Satin™ until your matte to gloss look is achieved (typically 1 oz per car)

Tire has been thoroughly cleaned with tire degreaser/cleaner

Luxe Satin™ can be applied by sponge (preferred) or micro-fiber towel

The Luxe Satin™ enhancement appears instantly as you apply it

Applying Luxe Satin™ only takes a few minutes

Apply Luxe Satin™ to obtain your desired look (Satin is shown)

The Luxe Satin™ finish will maintain the look without additional applications

High Performance Tire Treatment

HOW TO APPLY LUXE SATIN™ TIRE TREATMENT

CAUTION! Luxe Satin™ can harm skin. Follow safety steps .

- Wear gloves when applying Luxe Satin™.
- Do not touch your face while applying.
- Discard your gloves after use.
- Wash hands with soap and water.

FOR BEST RESULTS clean the tire with Luxe Wheel and Tire Cleaner to remove mold release agents, anti-oxidants and road grime. Make sure the tire is completely dry before applying Luxe Satin™ (Water prohibits the chemical bonding of the tire treatment.) Do not apply in direct sunlight.

IMPORTANT! MAKE SURE NO TREATMENT IS ON YOUR WHEELS. WIPE WHEELS WITH A CLEAN TOWEL. SPRAY LUXE WHEEL CLEANER ON THE TOWEL IF NEEDED.

MATTE FINISH – New Tire Natural Look (Low Gloss)

- Apply a lite coat until the tire attains your desired look
- Wait 2 to 4 hours before driving. Allow 24 hours to cure before driving in wet conditions.

GLOSS FINISH – High Gloss

- Apply even coats until the tire has a wet shiny high gloss look
- Wait 2 to 4 hours before driving. Allow 24 hours to cure before driving in wet conditions.
